Microsoft Dynamics NAV

Microsoft Dynamics NAV offers small businesses, medium companies and large enterprises a powerful yet cost-effective solution that can be tailored for your company. It can support customization and add-on software to meet industry or other specific needs. In addition, it can adapt as a growing business needs more power and functionality.

Microsoft Dynamics NAV addresses the following business needs – Financial Management, Distribution, Manufacturing, Marketing, Sales, Purchase, Project Management and Servicing.

Some of the many business benefits from Microsoft Dynamics NAV are:

- Well defined standard operating procedures, providing Visibility of company operation from Accounting, to manufacturing
- Cost reduction resulting in more efficient and productive business operation, and lower human error
- Flexibility to respond to business changes due to up-to-date, integrated company information

- Easier, Faster and more accurate decision-making as the result of real time, reporting and analysis
- Increase sales and strengthen customer loyalty with better quality of service delivery, thus increasing recurring revenue, and profitability

Microsoft Dynamics CRM

Microsoft Dynamics CRM is a complete customer relationship management solution that provides all of the tools and capabilities needed to create and easily maintain a clear picture of customers from first contact through purchase and post-sales. With modules for sales, marketing, and customer service, Microsoft CRM delivers a fast, flexible, and affordable solution that drives consistent, measurable improvements in every business process, enables closer relationships with customers, and helps your company achieve new levels of profitability.

Microsoft SQL Reporting and Analysis Services

Your competitive edge depends on how well you can make decision out of your company's information. Therefore, being able to report and analyze are crucial for all businesses.

Microsoft SQL Reporting Services allows business leaders to create, manage and deliver server-based reports with interactive views that provide valuable insights into where business is heading.

Microsoft SQL Analysis Services provide a consolidated view across all business dimensions as foundation for all relational, multidimensional and predictive analysis enabling deep insight into the key drivers impacting business.

Microsoft Sharepoint Services

Microsoft Windows SharePoint Services is a versatile technology that organizations and business units of all sizes can use to increase the efficiency of business processes and improve team productivity. With tools for collaboration that help people stay connected across organizational and geographic boundaries, Windows SharePoint Services gives people access to information they need.

Built on Microsoft Windows Server 2003, Windows SharePoint Services also provides a foundation platform for building Web-based business applications that can flex and scale easily to meet the changing and growing needs of your business. With a familiar, Web-based interface and close integration with everyday tools including the Microsoft Office system, Windows SharePoint Services is easy to use and can be deployed rapidly.

Integration with other Microsoft Office Solutions

All Microsoft Solutions are developed to interact seamlessly with each other. Data from one application can be migrated to Microsoft Office solutions such as Microsoft Words, Excel, Outlook, Exchange etc, and vice versa. Combining the comprehensive offerings of individual solution, Microsoft solutions offer a powerful platform to achieve your business goals and strategies.
